(b) The grant of any additional cable television franchise(s) shall not be on terms more favorable or less burdensome than those contained in this Renewal Franchise. The grant of any additional cable television franchise(s) shall be at the sole discretion of the Franchising Authority.

(i) In the event that the Franchisee believes that any additional cable television franchise(s) have been granted on terms and conditions more favorable or less burdensome than those contained in this Renewal Franchise, the Franchisee may request, in writing, that the Franchising Authority convene a public hearing on that issue. The Franchising Authority shall complete review of the request for transfer and make a decision thereto no later than one hundred twenty (120) days after receipt of the request for transfer. If the Franchising Authority fails to render a final decision on such request within said 120 days, such request shall be deemed granted unless the requesting party and the Franchising Authority agree to an extension of time.

(e) For purposes of determining whether it shall consent to any such change of control and ownership, the Franchising Authority shall consider the legal, financial and technical qualifications of the prospective controlling or owning Person, and any other criteria allowable under State and/or federal law(s).

(f) Any proposed controlling or owning Person or transferee approved by the Franchising Authority shall be subject to all of the terms and conditions contained in this Renewal Franchise.

(a) The taking of any action in violation of Section 3.1 herein shall be null and void, and shall be deemed a material breach of this Renewal Franchise.

(b) If the Franchising Authority denies its consent to any such action and a transfer has nevertheless been effected, the Franchising Authority may revoke and terminate this Renewal Franchise.
(c) The grant or waiver of any one or more of such consents shall not render unnecessary any subsequent consent or consents, nor shall the grant of any such consent constitute a waiver of any other rights of the City.

Section 3.3—NO WAIVER OF RIGHTS

The consent or approval of the Franchising Authority to any assignment, lease, transfer or sublease of the Renewal Franchise granted to the Franchisee shall not constitute a waiver or release of the rights of the City in and to the streets and Public Ways or any other rights of the City under this Renewal Franchise, and any such transfer shall, by its terms, be expressly subordinate to the terms and conditions of the Renewal Franchise.

A standard aerial installation charge shall be established by the Franchisee which shall apply to any residence located not more than one hundred and fifty feet (150') from the existing aerial Trunk and Distribution System and additions thereto. The Franchisee may charge residents located more than 150 feet from the existing aerial Trunk and Distribution System, and additions thereto, time and materials charges plus a return on investment in accordance with applicable law(s). The Franchisee shall have up to, but not more than, ninety (90) days in order to survey, design and install non-standard installations that are more than 150 feet from the existing trunk and distribution system.

(c) Underground installation shall continue to be considered standard and therefore subject to standard underground installation rates within one hundred fifty feet (150') of the existing Cable System plant, provided no Trunk and Distribution System construction is required and subsurface is dirt or similar soft surface. (b) Underground cable lines shall be placed beneath the pavement subgrade in compliance with applicable City by-laws, rules, regulations and/or standards. § 76.605 Technical standards.

(a) As of December 30, 1992, unless otherwise noted, the following requirements apply to the performance of a cable television system as measured at any subscriber terminal with a matched impedance at the termination point or at the output of the modulating or processing equipment (generally the headend) of the cable television system or otherwise as noted. The requirements are applicable to each NTSC or similar video downstream cable television channel in the system:

(1)(i) The cable television channels delivered to the subscriber's terminal shall be capable of being received and displayed by TV broadcast receivers used for off-the-air reception of TV broadcast signals, as authorized under part 73 of this chapter; and

(ii) Cable television systems shall transmit signals to subscriber premises equipment on frequencies in accordance with the channel allocation plan set forth in the Electronics Industries Association's "Cable Television Channel Identification Plan, EIA IS-132, May 1994" (EIA IS-132). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Cable systems are required to use this channel allocation plan for signals transmitted in the frequency range 54 MHz to 1002 MHz. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Copies of EIA IS-132 may be obtained from: Global Engineering Documents, 2805 McGraw Ave., Irvine CA 92714. Copies of EIA IS-132 may be inspected during normal business hours at the following locations: Federal Communications Commission, 1919 M Street, NW, Dockets Branch (Room 239), Washington, DC, or the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. This requirement is applicable on May 31, 1995, for new and re-built cable systems, and on June 30, 1997, for all cable systems.

(2) The aural center frequency of the aural carrier must be 4.5 MHz \pm 5 kHz above the frequency of the visual carrier at the output of the modulating or processing equipment of a cable television system, and at the subscriber terminal.

(3) The visual signal level, across a terminating impedance which correctly matches the internal impedance of the cable system as viewed from the subscriber terminal, shall not be less than 1 millivolt across an internal impedance of 75 ohms (0 dBmV). Additionally, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, it shall not be less than 1.41 millivolts across an internal impedance of 75 ohms (+3 dBmV). (At other impedance values, the minimum visual signal level, as viewed from the subscriber terminal, shall be the square root of 0.0133 (2) millivolts and, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, shall be 2 times the square root of
Nashua Cable Television Renewal Franchise

0.00662(Z) millivolts, where Z is the appropriate impedance value.)

(4) The visual signal level on each channel, as measured at the end of a 30 meter cable drop that is connected to the subscriber tap, shall not vary more than 8 decibels within any six-month interval, which must include four tests performed in six-hour increments during a 24-hour period in July or August and during a 24-hour period in January or February, and shall be maintained within:

(i) 3 decibels (dB) of the visual signal level of any visual carrier within a 6 MHz nominal frequency separation;
(ii) 10 dB of the visual signal level on any other channel on a cable television system of up to 300 MHz of cable distribution system upper frequency limit, with a 1 dB increase for each additional 100 MHz of cable distribution system upper frequency limit (e.g., 11 dB for a system at 301-400 MHz; 12 dB for a system at 401-500 MHz, etc.); and
(iii) A maximum level such that signal degradation due to overload in the subscriber's receiver or terminal does not occur.

(5) The rms voltage of the aural signal shall be maintained between 10 and 17 decibels below the associated visual signal level. This requirement must be met both at the subscriber terminal and at the output of the modulating and processing equipment (generally the headend). For subscriber terminals that use equipment which modulate and remodulate the signal (e.g., baseband converters), the rms voltage of the aural signal shall be maintained between 6.5 and 17 decibels below the associated visual signal level at the subscriber terminal.

(6) The amplitude characteristic shall be within a range of ±2 decibels from 0.75 MHz to 5.0 MHz above the lower boundary frequency of the cable television channel, referenced to the average of the highest and lowest amplitudes within these frequency boundaries.

(i) Prior to December 30, 1999, the amplitude characteristic may be measured after a subscriber tap and before a converter that is provided and maintained by the cable operator.

(ii) As of December 30, 1999, the amplitude characteristic shall be measured at the subscriber terminal.

(7) The ratio of RF visual signal level to system noise shall be as follows:

(i) From June 30, 1992, to June 30, 1993, shall not be less than 36 decibels.

(ii) From June 30, 1993 to June 30, 1995, shall not be less than 40 decibels.

(iii) As of June 30, 1995, shall not be less than 43 decibels.

(iv) For class I cable television channels, the requirements of paragraphs (a)(7)(i), (a)(7)(ii) and (a)(7)(iii) of this section are applicable only to:

(A) Each signal which is delivered by a cable television system to subscribers within the predicted Grade B contour for that signal;

(B) Each signal which is first picked up within its predicted Grade B contour;

(C) Each signal that is first received by the cable television system by direct video feed from a TV broadcast station, a low power TV station, or a TV translator station.

(8) The ratio of visual signal level to the rms amplitude of any coherent disturbances such as intermodulation products, second and third order distortions or discrete-frequency interfering signals not operating on proper offset assignments shall be as follows:

(i) The ratio of visual signal level to coherent disturbances shall not be less than 51 decibels for noncoherent channel cable television systems, when measured with modulated carriers and time averaged; and

(ii) The ratio of visual signal level to coherent disturbances which are frequency-coincident with the visual carrier shall not be less than 47 decibels for coherent channel cable systems, when measured with modulated carriers and time averaged.

(9) The terminal isolation provided to each subscriber terminal:

(i) Shall not be less than 18 decibels. In lieu of periodic testing, the
cable operator may use specifications provided by the manufacturer for the
terminal isolation equipment to meet this standard; and
(ii) Shall be sufficient to prevent reflections caused by open-circuited or
short-circuited subscriber terminals from producing visible picture
impairments at any other subscriber terminal.
(10) The peak-to-peak variation in visual signal level caused by undesired
low frequency disturbances (hum or repetitive transients) generated within
the system, or by inadequate low frequency response, shall not exceed 3
percent of the visual signal level. Measurements made on a single channel
using a single unmodulated carrier may be used to demonstrate compliance with
this parameter at each test location.
(11) As of June 30, 1995, the following requirements apply to the performance
of the cable television system as measured at the output of the modulating or
processing equipment (generally the headend) of the system:
(i) The chrominance-luminance delay inequality (or chroma delay), which is
the change in delay time of the chrominance component of the signal relative
to the luminance component, shall be within 170 nanoseconds.
(ii) The differential gain for the color subcarrier of the television signal,
which is measured as the difference in amplitude between the largest and
smallest segments of the chrominance signal (divided by the largest and
expressed in percent), shall not exceed ±20%.
(iii) The differential phase for the color subcarrier of the television signal
which is measured as the largest phase difference in degrees between
each segment of the chrominance signal and reference segment (the segment at
the blanking level of 0 TRE), shall not exceed ±10 degrees.
(12) As an exception to the general provision requiring measurements to be
made at subscriber terminals, and without regard to the type of signals
carried by the cable television system, signal leakage from a cable
television system shall be measured in accordance with the procedures
outlined in § 76.609(h) and shall be limited as follows:

<table>
<thead>
<tr>
<th>Frequencies</th>
<th>Signal leakage limit (micro-volt/m)</th>
<th>Distance in meters (m)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than and including 54 MHz, and over 216 MHz</td>
<td>15</td>
<td>30</td>
</tr>
<tr>
<td>Over 54 up to and including 216 MHz</td>
<td>20</td>
<td>3</td>
</tr>
</tbody>
</table>

(b) Cable television systems distributing signals by using methods such as
nonconventional coaxial cable techniques, noncoaxial copper cable techniques,
specialized coaxial cable and fiber optical cable hybridization techniques or
specialized compression techniques or specialized receiving devices, and
which, because of their basic design, cannot comply with one or more of the
technical standards set forth in paragraph (a) of this section, may be
permitted to operate: Provided, That an adequate showing is made pursuant to
§ 76.7 which establishes that the public interest is benefited. In such
instances, the Commission may prescribe special technical requirements to
ensure that subscribers to such systems are provided with an equivalent level
of good quality service.

Note 1: Local franchising authorities of systems serving fewer than 1000
subscribers may adopt standards less stringent than those in § 76.605(a). Any
such agreement shall be reduced to writing and be associated with the
system's proof-of-performance records.

Note 2: For systems serving rural areas as defined in § 76.5, the system may
negotiate with its local franchising authority for standards less stringent
than those in §§ 76.605(a)(3), 76.605(a)(7), 76.605(a)(8), 76.605(a)(10) and 76.605(a)(11). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

Note 3: The requirements of this section shall not apply to devices subject to the provisions of §§ 15.601 through 15.626.

Note 4: Should subscriber complaints arise from a system failing to meet § 76.605(a)(6) prior to December 30, 1999, the cable operator will be required to provide a converter that will allow the system to meet the standard immediately at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order all converters on the system be changed to meet the standard.

Note 5: Should subscriber complaints arise from a system failing to meet § 76.605(a)(10), the cable operator will be required to remedy the complaint and perform test measurements on § 76.605(a)(10) containing the full number of channels as indicated in § 76.601(b)(2) at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order that the full number of channels as indicated in § 76.601(b)(2) be tested at all required locations for future proof-of-performance tests.

Note 6: No State or franchising authority may prohibit, condition, or restrict a cable system's use of any type of subscriber equipment or any transmission technology.

The Franchisee shall provide the following broad categories of Programming:

- News Programming;
- Sports Programming;
- Public Affairs Programming;
- Children's Programming;
- Entertainment Programming; and
- Local Programming.

For informational purposes, it is the Franchisee's intention to have the following channel line-up upon the Effective Date of the Renewal Franchise, subject to applicable law and the Franchisee's editorial discretion.

FCC CUSTOMER SERVICE OBLIGATIONS

TITLE 47--TELECOMMUNICATION
CHAPTER I--FEDERAL COMMUNICATIONS COMMISSION
PART 76--CABLE TELEVISION SERVICE
Subpart H--General Operating Requirements

Sec. 76.309 Customer Service Obligations

(a) A cable franchise authority may enforce the customer service standards set forth in paragraph (c) of this section against cable operators. The franchise authority must provide affected cable operators ninety (90) days written notice of its intent to enforce the standards.

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any State or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(1) Cable system office hours and telephone availability--

(i) The cable operator will maintain a local, toll-free or collect call telephone access line which will be available to its subscribers 24 hours a day, seven days a week.

(A) Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

(B) After normal business hours, the access line may be answered by a service or an automated response system, including an answering machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day.

(ii) Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty (30) seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty (30) seconds. These standards shall be met no less than ninety (90) percent of the time under normal operating conditions, measured on a quarterly basis.

(iii) The operator will not be required to acquire equipment or perform surveys to measure compliance with the telephone answering standards above unless an historical record of complaints indicates a clear failure to comply.

(iv) Under normal operating conditions, the customer will receive a busy signal less than three (3) percent of the time.

(v) Customer service center and bill payment locations will be open at least during normal
business hours and will be conveniently located.

(2) Installations, outages and service calls. Under normal operating conditions, each of the following four standards will be met no less than ninety-five (95) percent of the time measured on a quarterly basis:

(i) Standard installations will be performed within seven (7) business days after an order has been placed. “Standard” installations are those that are located up to 125 feet from the existing distribution system.

(ii) Excluding conditions beyond the control of the operator, the cable operator will begin working on “service interruptions” promptly and in no event later than 24 hours after the interruption becomes Known. The cable operator must begin actions to correct other service problems the next business day after notification of the service problem.

(iii) The “appointment window” alternatives for installations, service calls, and other installation activities will be either a specific time or, at maximum, a four-hour time block during normal business hours. (The operator may schedule service calls and other installation activities outside of normal business hours for the express convenience of the customer.)

(iv) An operator may not cancel an appointment with a customer after the close of business on the business day prior to the scheduled appointment.

(v) If a cable operator representative is running late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as necessary, at a time that is convenient for the customer.

(3) Communications between cable operators and cable subscribers--

(iii) Refunds--Refund checks will be issued promptly, but no later than either--

(iv) Credits--Credits for service will be issued no later than the customer's next billing cycle following the determination that a credit is warranted.

(4) Definitions--

(i) Normal business hours--The term “normal business hours” means those hours during which most similar businesses in the community are open to serve customers. In all cases, “normal business hours” must include some evening hours at least one night per week and/or some weekend hours.

(ii) Normal operating conditions--The term “normal operating conditions” means those service conditions which are within the control of the cable operator. Those conditions which are not within the control of the cable operator include, but are not limited to, natural disasters, civil disturbances, power outages, telephone network outages, and severe or unusual weather conditions. Those conditions which are ordinarily within the control of the cable operator include, but are not limited to, special promotions, pay-per-view events, rate increases, regular peak or seasonal demand periods, and maintenance or upgrade of the cable system.

(iii) Service interruption--The term “service interruption” means the loss of picture or sound on one or more cable channels.

RESOLUTION

APPROVING A PROPOSED CABLE TELEVISION FRANCHISE AGREEMENT RENEWAL BETWEEN THE CITY OF NASHUA AND COMCAST

CITY OF NASHUA

In the Year Two Thousand and Fifteen

RESOLVED by the Board of Aldermen of the City of Nashua to approve the cable television franchise agreement renewal between the City of Nashua and Comcast substantially in the form of the attached, and authorizing the Mayor to sign on behalf of the city.
Cable TV Franchise renewal

In order to provide their services, cable companies have to use the public rights-of-way (ROW) to install their cable equipment and facilities throughout the city. A cable franchise is the formal agreement between the City and a cable provider outlining the terms and conditions under which it can use the public ROW. The franchise imposes various obligations on the cable company including compensating the City for use of the ROW, protecting the rights and interests of Nashua residents and cable subscribers, and providing certain public benefits.

Comcast - the nation's largest cable television provider - is currently the primary source of cable television services in Nashua. They currently operate in Nashua under a franchise agreement effective since October 1, 2005. The current franchise agreement in Nashua has a 10 year term. The current franchise agreement expires **September 30, 2015**.

The franchise renewal process is governed by federal law (**Section 626 of Cable Act, 47 CFR 546**). It occurs within a three (3) year period before a franchise expires. This period is designed to provide the City with sufficient time to:

- Evaluate the extent to which the cable operator has complied with its legal and franchise obligations during the term of the franchise;
- Determine the future cable-related needs and interests its residents (called "ascertainment"); and
- Negotiate with the cable provider on the conditions of any renewed franchise agreement, including cable-related benefits to help meet the needs identified during the ascertainment process.

**What City Negotiators CAN do:**

- Conduct an ascertainment process to determine community needs and interests. Under the existing franchise, for example, the City received potential use of up to 16 cable channels for the carriage of local, non-commercial programming. It also secured free cable service to city buildings and schools.
- Identify circumstances where the cable operator has failed to live up to its obligations.
- Deny the renewal, but only after a lengthy, formal process to determine if the cable operator has failed to meet certain criteria.
- Hold Comcast accountable for certain customer-service aspects of cable-modem service under a "bill of rights" adopted by city ordinance.

**What City Negotiators CANNOT do:**

- Control prices and what Comcast charges customers for cable modems or cable TV, with the limited exception of the price for the Limited Basic TV package.
- Control what commercial channels Comcast makes available, although the City can require certain categories of programming.
• Make demands about cable-modem (Internet) service because, technically, it's not part of the franchise.

What has occurred to date;
• Mayor appointed a Franchise renewal working team;
  o Brian Geraghty - Citizen of Nashua
  o Tom Galligani - Director of Economic Development
  o Bruce Codagnone - Director of Information Technology
  o Andrew Cernota - Chairman of CTAB
  o Celia Leonard - Assistant Corporation Counsel
  o Daniel Moriarty – Alderman-At-Large
• Public Hearing held – December 10th 2014 at 7:00 PM in the City Hall Auditorium
• Conducted a Survey
  o 365 Total Responses
  o Frequently asked about competition – FIOS not available in New Hampshire and any other cable company would have to buy Comcast's infrastructure.
  o There were a great deal of complaints around Internet service – this is outside the scope of the Franchise agreement.
  o The Survey results are posted on the City’s website
• Created an information webpage on the City’s website.  
• Conducted Monthly meetings with Franchise renewal working team

Recommendations

Due to the shift from traditional TV viewing to watching programming via streaming through the Internet, the City’s revenue from Franchise fees could be negatively impacted. We recommend a shorter (7 Year) contract to see what federal legislation is going to be implemented.

Recommend funding the Public channel with Government and Education and breaking out the 4% franchise fee to 1.3% to PEG and 2.7% to the General Fund.

Recommend $151,000 for capital improvements since it is a 7 year instead of 10. Note this also is passed on to the citizens.

Based upon the survey results, we recommend asking Comcast for regular reporting on what they are doing to improve customer service.

We DO NOT recommend raising the Franchise fee since this fee is a direct pass through to the citizens of Nashua.

In the event that a Subscriber is aggrieved, the Franchising Authority or its designee(s) shall be responsible for receiving and acting upon such Subscriber Complaints and/or inquiries, as follows:

(i) Upon the written request of the Franchising Authority or its designee(s), the Franchisee shall, within ten (10) business days after receiving such request, send a written report to the Franchising Authority with respect to any Complaint. Such report shall provide a full explanation of the investigation, finding and corrective steps taken by the Franchisee.

(ii) Should a Subscriber have an unresolved Complaint regarding cable television operations, the Subscriber shall be entitled to file his or her complaint with the Franchising Authority or its designee(s), who shall have primary responsibility for the continuing administration of this Renewal Franchise and the implementation of Complaint procedures. The Subscriber shall thereafter meet jointly with the Franchising Authority or its designee(s) and a representative of the Franchisee, within thirty (30) days of the Subscriber's filing of his or her Complaint, in order to fully discuss and resolve such matter. The Franchisee shall notify each new Subscriber, at the time of initial installation of Cable Service, of the procedures for reporting and resolving all of such Complaints, and annually to all Subscribers.

(c) Notwithstanding the foregoing, if the Franchising Authority or its designee(s) determines it to be in the public interest, the Franchising Authority or its designee(s) may investigate any multiple Complaints or disputes brought by Subscribers arising from the operations of the Franchisee.

(d) In the event that the Franchising Authority or its designee(s) finds a pattern of multiple unresolved Subscriber Complaints, the Franchising Authority or its designee(s) and the Franchisee shall discuss, in good faith, possible amendments to the Franchisee's procedures for the resolution of Complaints.
Section 13.8—REMOTE CONTROL DEVICES

The Franchisee shall allow its Subscribers to purchase, from legal and authorized parties other than the Franchisee, own, utilize and program remote control devices which are compatible with the Converter(s) provided by the Franchisee. The Franchisee takes no responsibility for changes in its equipment which might make inoperable the remote control devices acquired by Subscribers.

Section 13.9—EMPLOYEE/CONTRACTOR IDENTIFICATION CARDS

All of the Franchisee's employees and/or contractors entering upon private property, in connection with the construction, installation, maintenance and/or operation of the Cable System, including repair and sales personnel, shall be required to produce, upon request, an identification card and bearing a picture of said employee or contractor. If such employee(s) is not wearing such a photo-identification card and, as a result, is not admitted to a Subscriber's home, such visit shall be deemed to be a missed service visit by the Franchisee.

Section 13.10—PROTECTION OF SUBSCRIBER PRIVACY

(a) The Franchisee shall respect the rights of privacy of every Subscriber and/or User of the Cable Television System and shall not violate such rights through the use of any device or Signal associated with the Cable Television System, and as hereafter provided.

(c) The Franchisee shall be responsible for carrying out and enforcing the Cable System's privacy policy, and shall at all times maintain adequate physical, technical and administrative security safeguards to ensure that personal subscriber information is handled and protected strictly in accordance with this policy.

Section 13.11—PRIVACY WRITTEN NOTICE

At the time of entering into an agreement to provide any cable service or other service to a Subscriber, and annually thereafter to all Cable System Subscribers, the Franchisee shall provide Subscribers with written notice, as required by Section 631(a)(1) of the Cable Act, which, at a minimum, clearly and conspicuously explains the Franchisee's practices regarding the collection, retention, uses, and dissemination of personal subscriber information, and describing the Franchisee's policy for the protection of subscriber privacy.

Section 13.12—MONITORING

(a) Neither the Franchisee nor its agents nor the City nor its agents shall tap, monitor, arrange for the tapping or monitoring, or permit any other Person to tap or monitor, any cable, line, Signal,
input device, or subscriber Outlet or receiver for any purpose, without the prior written authorization of the affected Subscriber; provided, however, that the Franchisee may conduct system-wide or individually addressed "sweeps" solely for the purpose of verifying System integrity, checking for illegal taps, controlling return-path transmission, billing for pay Services or monitoring channel usage in a manner not inconsistent with the Cable Act. The Franchisee shall report to the affected parties and the Franchising Authority any instances of monitoring or tapping of the Cable Television System, or any part thereof, of which it has knowledge, whether or not such activity has been authorized by the Franchisee.

(b) The Franchisee shall not record or retain any information transmitted between a Subscriber and any third party, except as required for lawful business purposes. The Franchisee shall destroy all subscriber information of a personal nature when such information is no longer necessary for the Franchisee's lawful business purposes, or as required by applicable State and/or federal law(s).

Section 13.13--DISTRIBUTION OF SUBSCRIBER INFORMATION

Subject to Section 631 of the Cable Act, the Franchisee and its agents and/or employees shall not, without giving Subscribers an opportunity to prevent disclosure, disclose to any third party data identifying or designating any Subscriber either by name or address. Said opportunity to prevent disclosure shall be provided to each Subscriber annually through a written notice. A Subscriber shall have the right, at any time, to request the Franchisee not to disclose to any third party data identifying the Subscriber either by name or address and the Franchisee shall abide by this request.

Section 13.14--POLLING BY CABLE

No poll of a Subscriber(s) shall be conducted or obtained, unless (i) the program shall contain an explicit disclosure of the nature, purpose and prospective use of the results of the poll, and (ii) the program has an informational, entertainment or educational function which is self-evident. The Franchisee or its agents shall release the results only in the aggregate and without individual references.

Section 13.15---INFORMATION WITH RESPECT TO VIEWING HABITS AND SUBSCRIPTION DECISIONS

Except as permitted by §631 of the Cable Act or pursuant to an order by a court, neither the Franchisee nor its agents nor its employees shall make available to any third party information concerning the viewing habits or subscription package decisions of any individual Subscriber.

Section 13.16--SUBSCRIBER'S RIGHT TO INSPECT AND VERIFY INFORMATION

(a) The Franchisee shall make available for inspection by a Subscriber at a reasonable time and place all personal subscriber information that the Franchisee maintains regarding said Subscriber.

(b) A Subscriber may obtain from the Franchisee a copy of any or all of the personal subscriber information regarding him or her maintained by the Franchisee. The Franchisee may require a
reasonable fee for making said copy.

(c) A Subscriber(s) may challenge the accuracy, completeness, retention, use or dissemination of any item of personal subscriber information. Such challenges and related inquiries about the handling of subscriber information shall be directed to the Franchisee's General Manager. The Franchisee shall change any such information upon a reasonable showing by any Subscriber that such information is inaccurate.

Section 13.17--PRIVACY STANDARDS REVIEW

The Franchising Authority and the Franchisee shall periodically review this Article 13 to determine that it effectively addresses appropriate concerns about privacy. This Article may be amended periodically by agreement of the Franchising Authority and the Franchisee.

§ 76.605 Technical standards.

(a) As of December 30, 1992, unless otherwise noted, the following requirements apply to the performance of a cable television system as measured at any subscriber terminal with a matched impedance at the termination point or at the output of the modulating or processing equipment (generally the headend) of the cable television system or otherwise as noted. The requirements are applicable to each NTSC or similar video downstream cable television channel in the system:

1. (i) The cable television channels delivered to the subscriber's terminal shall be capable of being received and displayed by TV broadcast receivers used for off-the-air reception of TV broadcast signals, as authorized under part 73 of this chapter; and

(ii) Cable television systems shall transmit signals to subscriber premises equipment on frequencies in accordance with the channel allocation plan set forth in the Electronics Industries Association's "Cable Television Channel Identification Plan, EIA IS-132, May 1994" (EIA IS-132). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Cable systems are required to use this channel allocation plan for signals transmitted in the frequency range 54 MHz to 1002 MHz. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Copies of EIA IS-132 may be obtained from: Global Engineering Documents, 2805 McGraw Ave., Irvine CA 92714. Copies of EIA IS-132 may be inspected during normal business hours at the following locations: Federal Communications Commission, 1919 M Street, NW, Dockets Branch (Room 239), Washington, DC, or the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC. This requirement is applicable on May 31, 1995, for new and re-built cable systems, and on June 30, 1997, for all cable systems.

2. The aural center frequency of the aural carrier must be 4.5 MHz ± 5 kHz above the frequency of the visual carrier at the output of the modulating or processing equipment of a cable television system, and at the subscriber terminal.

3. The visual signal level, across a terminating impedance which correctly matches the internal impedance of the cable system as viewed from the subscriber terminal, shall not be less than 1 millivolt across an internal impedance of 75 ohms (0 dBmV). Additionally, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, it shall not be less than 1.41 millivolts across an internal impedance of 75 ohms (+3 dBmV). (At other impedance values, the minimum visual signal level, as viewed from the subscriber terminal, shall be the square root of 0.0133 (Z) millivolts and, as measured at the end of a 30 meter (100 foot) cable drop that is connected to the subscriber tap, shall be 2 times the square root of
Nashua Cable Television Renewal Franchise

0.00662(Z) millivolts, where Z is the appropriate impedance value.)

(4) The visual signal level on each channel, as measured at the end of a 30 meter cable drop that is connected to the subscriber tap, shall not vary more than 8 decibels within any six-month interval, which must include four tests performed in six-hour increments during a 24-hour period in July or August and during a 24-hour period in January or February, and shall be maintained within:

(i) 3 decibels (dB) of the visual signal level of any visual carrier within a 6 MHz nominal frequency separation;

(ii) 10 dB of the visual signal level on any other channel on a cable television system of up to 300 MHz of cable distribution system upper frequency limit, with a 1 dB increase for each additional 100 MHz of cable distribution system upper frequency limit (e.g., 11 dB for a system at 301-400 MHz; 12 dB for a system at 401-500 MHz, etc.);

(iii) A maximum level such that signal degradation due to overload in the subscriber's receiver or terminal does not occur.

(5) The rms voltage of the aural signal shall be maintained between 10 and 17 decibels below the associated visual signal level. This requirement must be met both at the subscriber terminal and at the output of the modulating and processing equipment (generally the headend). For subscriber terminals that use equipment which modulate and remodulate the signal (e.g., baseband converters), the rms voltage of the aural signal shall be maintained between 6.5 and 17 decibels below the associated visual signal level at the subscriber terminal.

(6) The amplitude characteristic shall be within a range of ±2 decibels from 0.75 MHz to 5.0 MHz above the lower boundary frequency of the cable television channel, referenced to the average of the highest and lowest amplitudes within these frequency boundaries.

(i) Prior to December 30, 1999, the amplitude characteristic may be measured after a subscriber tap and before a converter that is provided and maintained by the cable operator.

(ii) As of December 30, 1999, the amplitude characteristic shall be measured at the subscriber terminal.

(7) The ratio of RF visual signal level to system noise shall be as follows:

(i) From June 30, 1992, to June 30, 1993, shall not be less than 36 decibels.

(ii) From June 30, 1993 to June 30, 1995, shall not be less than 40 decibels.

(iii) As of June 30, 1995, shall not be less than 43 decibels.

(iv) For class I cable television channels, the requirements of paragraphs (a)(7)(i), (a)(7)(ii) and (a)(7)(iii) of this section are applicable only to:

(A) Each signal which is delivered by a cable television system to subscribers within the predicted Grade B contour for that signal;

(B) Each signal which is first picked up within its predicted Grade B contour;

(C) Each signal that is first received by the cable television system by direct video feed from a TV broadcast station, a low power TV station, or a TV translator station.

(8) The ratio of visual signal level to the rms amplitude of any coherent disturbances such as intermodulation products, second and third order distortions or discrete-frequency interfering signals not operating on proper offset assignments shall be as follows:

(i) The ratio of visual signal level to coherent disturbances shall not be less than 51 decibels for noncoherent channel cable television systems, when measured with modulated carriers and time averaged; and

(ii) The ratio of visual signal level to coherent disturbances which are frequency-coincident with the visual carrier shall not be less than 47 decibels for coherent channel cable systems, when measured with modulated carriers and time averaged.

(9) The terminal isolation provided to each subscriber terminal:

(i) Shall not be less than 18 decibels. In lieu of periodic testing, the
cable operator may use specifications provided by the manufacturer for the
terminal isolation equipment to meet this standard; and
(ii) Shall be sufficient to prevent reflections caused by open-circuited or
short-circuited subscriber terminals from producing visible picture
impairments at any other subscriber terminal.
(10) The peak-to-peak variation in visual signal level caused by undesired
low frequency disturbances (hum or repetitive transients) generated within
the system, or by inadequate low frequency response, shall not exceed 3
percent of the visual signal level. Measurements made on a single channel
using a single unmodulated carrier may be used to demonstrate compliance with
this parameter at each test location.
(11) As of June 30, 1995, the following requirements apply to the performance
of the cable television system as measured at the output of the modulating or
processing equipment (generally the headend) of the system:
(i) The chrominance-luminance delay inequality (or chroma delay), which is
the change in delay time of the chrominance component of the signal relative
to the luminance component, shall be within 170 nanoseconds.
(ii) The differential gain for the color subcarrier of the television signal,
which is measured as the difference in amplitude between the largest and
smallest segments of the chrominance signal (divided by the largest and
expressed in percent), shall not exceed ±20%.
(iii) The differential phase for the color subcarrier of the television
signal which is measured as the largest phase difference in degrees between
each segment of the chrominance signal and reference segment (the segment at
the blanking level of 0 IRE), shall not exceed ±10 degrees.
(12) As an exception to the general provision requiring measurements to be
made at subscriber terminals, and without regard to the type of signals
carried by the cable television system, signal leakage from a cable
television system shall be measured in accordance with the procedures
outlined in § 76.609(h) and shall be limited as follows:

(b) Cable television systems distributing signals by using methods such as
nonconventional coaxial cable techniques, noncoaxial copper cable techniques,
specialized coaxial cable and fiber optical cable hybridization techniques or
specialized compression techniques or specialized receiving devices, and
which, because of their basic design, cannot comply with one or more of the
technical standards set forth in paragraph (a) of this section, may be
permitted to operate: Provided, That an adequate showing is made pursuant to
§ 76.7 which establishes that the public interest is benefited. In such
instances, the Commission may prescribe special technical requirements to
ensure that subscribers to such systems are provided with an equivalent level
of good quality service.

Note 1: Local franchising authorities of systems serving fewer than 1000
subscribers may adopt standards less stringent than those in § 76.605(a). Any
such agreement shall be reduced to writing and be associated with the
system's proof-of-performance records.

Note 2: For systems serving rural areas as defined in § 76.5, the system may
negotiate with its local franchising authority for standards less stringent
than those in §§ 76.605(a)(3), 76.605(a)(7), 76.605(a)(8), 76.605(a)(10) and 76.605(a)(11). Any such agreement shall be reduced to writing and be associated with the system's proof-of-performance records.

**Note 3:** The requirements of this section shall not apply to devices subject to the provisions of §§ 15.601 through 15.626.

**Note 4:** Should subscriber complaints arise from a system failing to meet § 76.605(a)(6) prior to December 30, 1999, the cable operator will be required to provide a converter that will allow the system to meet the standard immediately at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order all converters on the system be changed to meet the standard.

**Note 5:** Should subscriber complaints arise from a system failing to meet § 76.605(a)(10), the cable operator will be required to remedy the complaint and perform test measurements on § 76.605(a)(10) containing the full number of channels as indicated in § 76.601(b)(2) at the complaining subscriber's terminal. Further, should the problem be found to be system-wide, the Commission may order that the full number of channels as indicated in § 76.601(b)(2) be tested at all required locations for future proof-of-performance tests.

**Note 6:** No State or franchising authority may prohibit, condition, or restrict a cable system's use of any type of subscriber equipment or any transmission technology.

The Franchisee shall provide the following broad categories of Programming:

Date:
Sec. 76.309 Customer Service Obligations

(a) A cable franchise authority may enforce the customer service standards set forth in paragraph (c) of this section against cable operators. The franchise authority must provide affected cable operators ninety (90) days written notice of its intent to enforce the standards.

(b) Nothing in this rule should be construed to prevent or prohibit:

(1) A franchising authority and a cable operator from agreeing to customer service requirements that exceed the standards set forth in paragraph (c) of this section;

(2) A franchising authority from enforcing, through the end of the franchise term, pre-existing customer service requirements that exceed the standards set forth in paragraph (c) of this section and are contained in current franchise agreements;

(3) Any State or any franchising authority from enacting or enforcing any consumer protection law, to the extent not specifically preempted herein; or

(4) The establishment or enforcement of any State or municipal law or regulation concerning customer service that imposes customer service requirements that exceed, or address matters not addressed by the standards set forth in paragraph (c) of this section.

(c) Effective July 1, 1993, a cable operator shall be subject to the following customer service standards:

(1) Cable system office hours and telephone availability--

(i) The cable operator will maintain a local, toll-free or collect call telephone access line which will be available to its subscribers 24 hours a day, seven days a week.

(A) Trained company representatives will be available to respond to customer telephone inquiries during normal business hours.

(B) After normal business hours, the access line may be answered by a service or an automated response system, including an answering machine. Inquiries received after normal business hours must be responded to by a trained company representative on the next business day.

(ii) Under normal operating conditions, telephone answer time by a customer representative, including wait time, shall not exceed thirty (30) seconds when the connection is made. If the call needs to be transferred, transfer time shall not exceed thirty (30) seconds. These standards shall be met no less than ninety (90) percent of the time under normal operating conditions, measured on a quarterly basis.

(iii) The operator will not be required to acquire equipment or perform surveys to measure compliance with the telephone answering standards above unless an historical record of complaints indicates a clear failure to comply.

(iv) Under normal operating conditions, the customer will receive a busy signal less than three (3) percent of the time.

(v) Customer service center and bill payment locations will be open at least during normal
business hours and will be conveniently located.

(2) Installations, outages and service calls. Under normal operating conditions, each of the following four standards will be met no less than ninety-five (95) percent of the time measured on a quarterly basis:

(i) Standard installations will be performed within seven (7) business days after an order has been placed. "Standard" installations are those that are located up to 125 feet from the existing distribution system.

(ii) Excluding conditions beyond the control of the operator, the cable operator will begin working on "service interruptions" promptly and in no event later than 24 hours after the interruption becomes known. The cable operator must begin actions to correct other service problems the next business day after notification of the service problem.

(iii) The "appointment window" alternatives for installations, service calls, and other installation activities will be either a specific time or, at maximum, a four-hour time block during normal business hours. (The operator may schedule service calls and other installation activities outside of normal business hours for the express convenience of the customer.)

(iv) An operator may not cancel an appointment with a customer after the close of business on the business day prior to the scheduled appointment.

(v) If a cable operator representative is running late for an appointment with a customer and will not be able to keep the appointment as scheduled, the customer will be contacted. The appointment will be rescheduled, as necessary, at a time that is convenient for the customer.

(3) Communications between cable operators and cable subscribers—

(iii) Refunds—Refund checks will be issued promptly, but no later than either—

(iv) Credits—Credits for service will be issued no later than the customer's next billing cycle following the determination that a credit is warranted.

(4) Definitions—

(i) Normal business hours—The term "normal business hours" means those hours during which most similar businesses in the community are open to serve customers. In all cases, "normal business hours" must include some evening hours at least one night per week and/or some weekend hours.

(ii) Normal operating conditions—The term "normal operating conditions" means those service conditions which are within the control of the cable operator. Those conditions which are not within the control of the cable operator include, but are not limited to, natural disasters, civil disturbances, power outages, telephone network outages, and severe or unusual weather conditions. Those conditions which are ordinarily within the control of the cable operator include, but are not limited to, special promotions, pay-per-view events, rate increases, regular peak or seasonal demand periods, and maintenance or upgrade of the cable system.

(iii) Service interruption—The term "service interruption" means the loss of picture or sound on one or more cable channels.
