Electrical License Requirements (RSA 319-C)

In accordance with New Hampshire Statute, it is **unlawful** for anyone to install electrical work without a license unless they are exempt from the licensing requirements. No one is exempt from the Electrical Code requirements. All installations, regardless of who performs the work, must comply with New Hampshire and Nashua Electrical Codes.

Code Provisions (IBC)

Suspension or revocation of permit: The code official is authorized to suspend or revoke a permit issued under the provisions of this code wherever the permit is issued in error, on the basis of incorrect, inaccurate or incomplete information; in violation of any ordinance, regulation or any of the provisions of this code; or if there have been any false statements or misrepresentations as to the material fact in the application for permit. (105.6)

Permits obtained under false pretenses are subject to suspension or revocation: People are not permitted to obtain permits under the exemptions above then proceed to hire or contract with someone who is not properly licensed to do the work. (RSA 319-C)

Work commencing before permit issuance: Any person who commences any work before obtaining the necessary permits shall be subject to an additional fee established by the code official (100 percent of the permit fee but not to exceed \$250), in addition to the required permit fees. (109.4)
