

Coronavirus Disease (COVID-19)

Event Guidance

Updated August 16, 2021

Limiting Exposure - Staff and attendees should be advised to stay home if they have tested positive for COVID-19, are waiting for COVID-19 test results, have COVID-19 symptoms, or if they have had close contact with a person who has tested positive for or who has symptoms of COVID-19. It is highly recommended that individuals who are immunocompromised do not attend large gatherings.

Face Masks – All attendees are strongly recommended to wear a face mask while attending a public event in the City of Nashua. Public messaging should be communicated prior to the event through promotion and announcements should be broadcasted throughout the event. Public messaging in the form of signs and/or posters should also be prominently displayed around the event reminding attendees that face masks are strongly urged.

Social Distancing – All aspects of event planning should be made with social distancing in mind. Markings, tape, chalk, or other means should be utilized to visually represent social distancing where appropriate. Frequent signage throughout the event area should also be posted as a reminder. Events should be planned to allow as much continuous flow as possible to prevent areas from becoming congested.

Sanitation Measures – Adequate handwashing and/or hand sanitizing facilities should be provided throughout the designated event area and signage promoting the use of the stations should be prominently displayed.

Vaccination – Eligible staff and attendees are strongly urged to get vaccinated against COVID-19 before the event. Event coordinators should also consider offering the COVID-19 vaccine at the event. State and local health departments can provide on-site vaccinations to event attendees. To find a vaccine or to schedule vaccinations at the event, visit www.vaccines.nh.gov.

Community-based transmission status can be viewed on the City of Nashua [COVID-19 Data Dashboard](#).
