## Search by: Address – Map and Lot - Account - Owner

- Start by entering your search criteria– it will automatically populate a pick list as you type. Select from the list.
- The Query Results list will display and locations will be highlighted in yellow on the map.
- Select one or more from the list or the map for detailed property information and zoom to the result.
- Click the Select button if you want to save it to your Selected Records for exporting to .csv

**Enter Search Criteria** →

**Select from Pick List** →

**Toggle between Query Results and Selected records** →

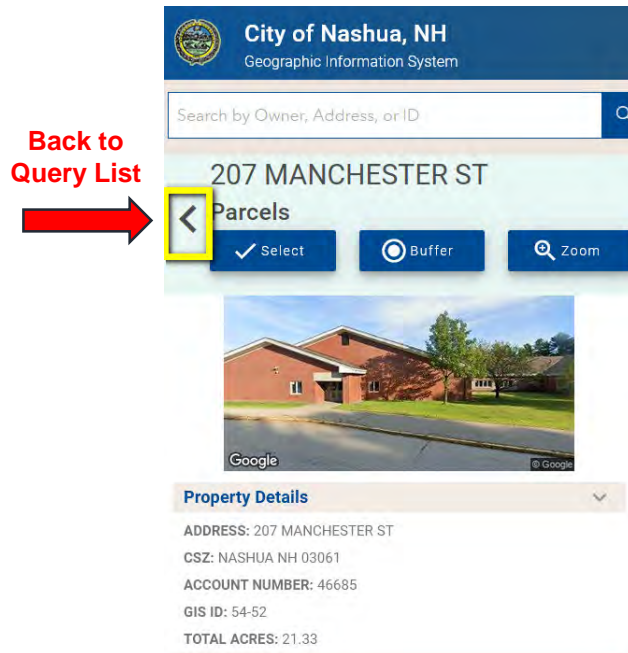

**Selected Records List** →

Use the “Back Button” to go from the Property Detail Screen back to the Query Results

The screenshots illustrate the workflow: 1. Entering search criteria in the search bar. 2. Viewing the 'QUERY RESULTS' list with a home icon for each entry. 3. Toggling to the 'SELECTED RECORDS' list where the home icons are checked. 4. Viewing the 'Selected Records List' with a 'Select' button highlighted in yellow.

## Clear Your Query and Selections

Use the “Back Arrow” to return to the Query Results from the Property Details Screen

Clear your Query Results and Selected Records
